## Is This Normal?

By Eddie Ingram

The question has been asked, “If the bath water could be raised one degree every ten minutes, how long would it take for someone to scream, ‘IT’S TOO HOT’”? We’ve all heard the story of how the temperature can be raised gradually in a pan of water holding a frog and he will never know he is in the process of boiling to death - until it’s too late! The point being that many times we can become so acclimated to our environment that we don’t know we’re being affected, or even hurt until it’s too late.

We must be very careful as we strive to live our Christian lives or this very principle can be our downfall. God has never accepted sin and thus, neither should we. But as you read this, think just in your own life how much things have changed over the years. Things that that used to shock you, things that people said and did, things that you heard and saw. Now the shock has worn off, or perhaps we have gotten used to the way people behave. We are now guilty of the statement, “Well nothing surprises me anymore”, or “That’s just the way the world is now!”

We now find ourselves going places that we never even considered years ago. We find ourselves doing things we never even thought about early in our life. We are watching things on TV or in the movies that would embarrass our grandparents. Yet all this, “this lifestyle”, has become a “NORMAL” way of life for many of us. We have come to accept it as part of our life. It’s affecting our nation, our homes, our children, and YES, it’s affecting the Lord’s church.

We must be aware of our surroundings and react accordingly. We must be aware that we are being “normalized” by the society we live in. Most importantly, we must realize the God’s standards and expectations have not changed! **Romans 12:2, “And do not be conformed to this world, but be transformed by the renewing of your mind, that you may prove what is that good and acceptable and perfect will of God.”**

Be on guard, lest you will never know when the water gets too hot!

Eddie
